

163.28 Licenses.

Before any person shall process any public or commercial garbage for swine, application for a license shall be made to the department setting forth the name and address of the applicant's proposed place of business, and the method used to process such garbage as outlined in section 163.27.

On receipt of such application, the secretary or the secretary's authorized agent shall at once inspect the premises on which the applicant proposes to conduct such business. If the inspector finds that said building complies with the requirements of this chapter, and with the rules of the department, and that the applicant is a responsible and suitable person, the inspector shall so certify in writing to the department.

On receipt of such certificate, the department shall issue a license to said applicant to conduct such business at the place specified until the first day of September following date of issue.

The license fee for each processing plant shall be fifty dollars, except that the first license fee may be prorated on a monthly basis as prescribed by the department. The secretary shall not issue a license which would permit the processing of any garbage for swine feeding after September 1, 1970.
